

## OFFICIAL REPORT: MRP SUPPLY VS DEMAND GAP

### 3.2: Health workforce supply is not keeping pace with service demand.

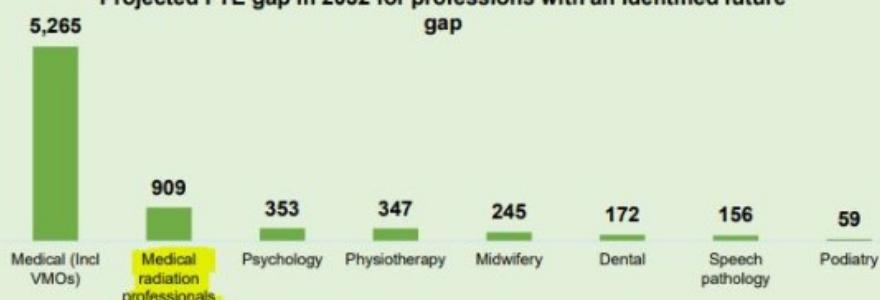

#### The evidence

Based on historical trends, the Queensland Health workforce will need to grow by approximately 46,000 FTE over the period 2023–32. This 30% increase in workforce will be needed to meet the expected growth in service demand<sup>41</sup>. For some professions, based on current workforce pipelines and Queensland Health market share, supply will not meet demand<sup>42</sup>.

**Proportion of projected demand able to be met with projected supply in 2032 for professions with an identified future gap**

**Projected FTE gap in 2032 for professions with an identified future gap**

Note: Medical radiation professionals include radiographers, nuclear medicine scientists/technologists and radiation therapists.

Source: Queensland Health Workforce Gap Analysis (Part A) – Medical radiation professionals include radiographers, nuclear medicine scientists/technologists and radiation therapists. Supply projected to meet only 58% of demand by 2032.
